VOLUME 46

NUMBER 7

ICSPE5

(ISSN 1057-7130)

SPECIAL ISSUE ON ISCAS'98

GUEST EDITORIAL

Introduction to the Special Issue on ISCAS'98 F. Maloberti 849

PAPERS

Analog

A CMOS Optical Pre-amplifier for Wireless Infrared Communications K. Phang and D. A. Johns 852
Distortion Compensation in Log-Domain Filters Using State-Space Techniques D. Frey 860

Applications

Single-Chip CMOS Image Sensors for a Retina Implant System M. Schwarz, R. Hauschild, B. J. Hosticka, J. Huppertz, T. Kneip, S. Kolnsberg, L. Ewe, and H. K. Trieu 870

Circuit Theory

Bifurcation of Switched Nonlinear Dynamical Systems T. Kousaka, T. Ueta, and H. Kawakami 878

Communications

Blind Joint Equalization and Multiuser Detection for DS-CDMA in Unknown Correlated Noise X. Wang and H. V. Poor 886

DSP and Multimedia

Filter Structures Composed of All-Pass and FIR Filters for Interpolation and Decimation by a Factor of Two H. Johansson and L. Wanhammar 896
Design of Very Low-Sensitivity and Low-Noise Recursive Filters Using a Cascade of Low-Order Lattice Wave Digital Filters J. Yli-Kaakinen and T. Saramäki 906

Neural Networks

Voice Extraction by On-Line Signal Separation and Recovery G. Erten and F. M. Salam 915

VLSI

Signal Coding for Low Power: Fundamental Limits and Practical Realizations S. Ramprasad, N. R. Shanbhag, and I. N. Hajj 923
Ultra Low-Voltage/Low-Power Digital Floating-Gate Circuits Y. Berg, D. T. Wisland, and T. S. Lande 930

TRANSACTIONS BRIEFS

Analog

Analytical Expressions for Harmonic Distortion at Low Frequencies due to Device Mismatch in CMOS Current Mirrors E. Bruun 937
The Architecture of Delta Sigma Analog-to-Digital Converters Using a Voltage-Controlled Oscillator as a Multibit Quantizer A. Iwata, N. Sakimura, M. Nagata, and T. Morie 941

Circuit Theory

The Design of an All-Digital Phase-Locked Loop with Small DCO Hardware and Fast Phase Lock J.-S. Chiang and K.-Y. Chen 945

(Contents Continued on Back Cover)

<i>Communications</i>	
Real-Time Streaming Video with Adaptive Bandwidth Control and DCT-Based Error Concealment	951
..... <i>Y. J. Chung, J. W. Kim, and C.-C. J. Kuo</i>	
<i>DSP and Multimedia</i>	
A Systematic Technique for Designing Approximately Linear Phase Recursive Digital Filters	956
..... <i>K. Surma-aho and T. Saramäki</i>	
On the Design of the Target-Signal Filter in Adaptive Beamforming	963
..... <i>M. Joho and G. S. Moschytz</i>	
<i>Neural Networks</i>	
Adaptation in an a VLSI Model of a Neuron	967
..... <i>M. F. Simoni and S. P. DeWeerth</i>	
<i>Power</i>	
The Formulation and Implementation of an Analog/Digital Control System for a 100-kW dc-to-dc Buck Chopper	971
..... <i>R. W. Ashton, J. G. Ciezki, and C. Mak</i>	
<i>VLSI</i>	
RF Low-Noise Amplifiers in BiCMOS Technologies	974
..... <i>F. Carreto-Castro, J. Silva-Martinez, and R. Murphy-Arteaga</i>	
<hr/>	
CALLS FOR PAPERS	
Special Section on Floating-Gate Circuits and Systems	978
Special Issue on High-Performance Analog-to-Digital and Digital-to-Analog Converters June 2000	979
2000 IEEE International Symposium on Circuits and Systems (ISCAS 2000).....	980

IEEE CIRCUITS AND SYSTEMS SOCIETY

The Circuits and Systems Society is an association of IEEE members with professional interest in the field of circuits and systems theory. All members of the IEEE are eligible for membership in the Society and will receive this TRANSACTIONS upon payment of the annual Society membership fee of \$7.00, plus an annual subscription fee of \$14.00. For information on joining, write to the IEEE at the address below. *Member copies of Transactions/Journals are for personal use only.*

IEEE TRANSACTIONS ON CIRCUITS AND SYSTEMS—II: ANALOG AND DIGITAL SIGNAL PROCESSING (ISSN 1057-7130) is published monthly by the Institute of Electrical and Electronics Engineers, Inc. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society/Council, or its members. **IEEE Corporate Office:** 3 Park Avenue, 17th Floor, New York, NY 10016-5997. **IEEE Operations Center:** 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331. **NJ Telephone:** 732-981-0060. **Price/Publication Information:** Individual copies: IEEE Members \$10.00 (first copy only), nonmembers \$20.00 per copy. (Note: Add \$4.00 postage and handling charge to any order from \$1.00 to \$50.00, including prepaid orders.) Member and nonmember subscription prices available upon request. Available in microfiche and microfilm. **Copyright and Reprint Permissions:** Abstracting is permitted with credit to the source. Libraries are permitted to photocopy for private use of patrons, provided the per-copy fee indicated in the code at the bottom of the first page is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. For all other copying, reprint, or republication permission, write to Copyrights and Permissions Department, IEEE Publications Administration, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331. Copyright © 1999 by The Institute of Electrical and Electronics Engineers, Inc. All rights reserved. Periodicals Postage Paid at New York, NY and at additional mailing offices. **Postmaster:** Send address changes to IEEE TRANSACTIONS ON CIRCUITS AND SYSTEMS—II: ANALOG AND DIGITAL SIGNAL PROCESSING, IEEE, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331. GST Registration No. 125634188. Printed in U.S.A.

INFORMATION FOR AUTHORS

The IEEE TRANSACTIONS ON CIRCUITS AND SYSTEMS II: ANALOG AND DIGITAL SIGNAL PROCESSING is published monthly with a distribution of over 100 000 copies. The field of interest covered includes analog, passive, switched-capacitor, and digital filters; electronic circuits, networks, and RF communication circuits; system theory; discrete, IC, and VLSI circuit design; multidimensional circuits and systems; large-scale systems; and nonlinear circuits and systems. Submissions dealing with application on circuits and systems are strongly encouraged. This TRANSACTIONS consists of two types of publications.

- 1) **Papers:** Contributions in this section describe excellent and useful new results, ideas, or innovations that advance significantly the state-of-the-art circuits and systems; alternatively, they may present excellent tutorial expositions on topics of current interest.
- 2) **Transactions Briefs:** Contributions in this section describe good new ideas, results, or innovations that advance measurably the state-of-the-art in circuits and systems.
- 3) **Circuits and Systems Tutorials:** Contributions in this section present, in a clearly legible manner, expositions on topics of interest to TRANSACTIONS readers. These papers lucidly explain topics in a tutorial fashion with a minimum of mathematical description. These papers should be legible to EE non-specialists. They must possess a new or innovative slant in the method of presentation.

The submission of a contribution is taken to manifest the fact that the submission has not been submitted, accepted, published, or copyrighted elsewhere. However, manuscripts submitted to or accepted by this TRANSACTIONS may also be submitted for oral presentation at the IEEE International Symposium on Circuits and Systems or other conferences sponsored by the IEEE Circuits and Systems Society.

Contributions which are of general interest and of value to the entire IEEE membership should be submitted for publication in the Proceedings of the IEEE. To avoid publication delays, please submit electronically all manuscripts to the Editor and observe the following guidelines.

A. Submission of a Paper or Transactions Brief

All papers must be submitted electronically. To submit your paper electronically:

- 1) Go to <http://cas2.tamu.edu/IEEE/index.htm>
- 2) Choose *Submit a Paper*.
- 3) Fill out the login form by providing your last and first name (first letter of each name capitalized), password (if you have entered into the database as an author before), and e-mail address
- 4) If you have entered the database before and you just entered your information correctly in the login form, you will be logged in and given the opportunity to submit your paper. If not, you will be asked to fill out a form with your name, address, email address, etc. You will also be asked to provide a password. Either way, you should click on the button to submit your paper.
- 5) Fill out the submission form and submit. This will add a record to the submission database and begin the submission process.
- 6) You will then receive a submission feedback page and a chance to upload your manuscript. You may upload a postscript, Microsoft Word, or pdf file by using the browse button to search your hard drive and hitting the "Submit Query" button.
- 7) If you get the "Thank you" page, your file has been submitted along with the information which describes it.
- 8) *Note:* Typical file sizes are between 1 and 3 MBytes. The smaller you make your file, the more likely it will be transferred without timing out. Currently the timeout value is set to 1 hour; however, congestion on the internet could cause it to stall indefinitely, in which case you should try your submission again during off hours in your area. Files of more than 10MB have been successfully transferred before, but only after repeated attempts during off hours.

B. Paper or Transactions Brief Guidelines

- 1) Manuscripts submitted as papers should state the significance of the problem in the Introduction.
- 2) The length of a manuscript submitted as a paper should not exceed the equivalent of 30 double-spaced typewritten pages (8 1/2 x 11) including figures, and a Transactions Brief should not exceed six double-spaced typewritten pages and six figures of moderate size, or eight double-spaced typewritten pages but no figures.

C. Style for Submission of Manuscript

- 1) The manuscript should be typewritten using double space; use one side of sheet only. (Good office-duplicated copies are acceptable.)
- 2) Provide an informative 100- to 250-word abstract, at the head of the manuscript.
- 3) Provide a separate double-spaced sheet listing all footnotes, beginning with "Manuscript received _____" and "Affiliation of author" and continuing with numbered footnotes. Acknowledgement of financial support is often placed at the end of the footnote.
- 4) References may appear as numbered footnotes, or in a separate bibliography at the end of the paper, with items referred to by numerals in square brackets, e.g. [12]. In either case, references should be complete and in IEEE style (see item 6).
 - a) *Style for papers:* Author, first initials followed by last name, title, volume, inclusive page numbers, month, and year.
 - b) *Style for books:* Author, title, location and publisher, year, chapter or page number (if desired).
- 5) Provide a separate sheet listing all figure captions, in proper style for the typesetter, e.g., "Fig. 6. The final wide-band amplifier design."
- 6) For further information see the booklet *Information for IEEE Transactions and Journal Authors*, available from the IEEE Periodicals Department, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331 or by email to trans@ieee.org or by fax at (732) 562-0545.

D. Style for Illustrations

Figures and photos should be original proofs and not copies. Photos must be glossy prints without screens. Laser prints are not acceptable in place of photos or where grayscale graphics are involved. All line drawings and photos should be in black and white, unless color is specifically requested. Font size should be readily legible when the drawing is reduced to a 1 or 2 column within (i.e., or as much as a 4:1 reduction from the original). All original material should not be larger than 8-1/2 × 11 in.

E. Page Charges

After a manuscript has been accepted for publication, the author's company or institution will be approached with a request to pay a charge of \$175 per page to cover part of the cost of publication. If the page charges are not met, then for any printed paper whose length exceeds eight pages, including illustrations, there will be a mandatory charge of \$175 per page for the additional pages. Payment of page charges (first eight only) for this IEEE TRANSACTIONS, like those for journals of other professional societies, is not obligatory nor is their payment a prerequisite for publication. The author will receive 100 free reprints (without covers) only if the page charge is honored. Detailed instructions will accompany the page proofs.

F. Copyright

It is the policy of the IEEE to own the copyright to the technical contributions it publishes. To comply with IEEE copyright policy, authors are required to sign an IEEE Copyright Transfer Form before publication is either the print or electronic medium. The form is provided upon approval of the manuscript. Authors must submit a signed copy of this form with their approved manuscript.

G. Special Issues and Special Sections

Special Issues or Special Sections of this TRANSACTIONS may be proposed to the Editor by any individual when a new, unique, exciting and/or timely subject area is identified. Special Sections consists of five to seven relevant papers.

H. Electronic Form of Final Manuscript

For the final printed production of the manuscript, the author will need to provide a disk (3-1/2") and two paper copies of the peer approved version. Please be certain that changes made to the paper version are incorporated into your disk version and include an ASCII version of the file. Note the operating system (DOS, MAC, UNIX, etc.) and the software used on the label of the disk. Check that your files are complete including: abstract, text, references, footnotes, biographies, and figure captions. IEEE can process most commercial software, but not page layout programs (i.e., FrameMaker). Do not send PostScript files. The preferred programs are TEX, LATEX, and WordPerfect (use standard macros). At IEEE, LATEX style files can be obtained by email at "help@ep.ieee.org."

CALL FOR PAPERS

Special Issue on High-Performance Analog-to-Digital and Digital-to-Analog Converters June 2000

Analog-to-digital (A/D) and digital-to-analog (D/A) converters play a critical role in today's microelectronic systems. From audio and video applications to wireless and broadband communications, data converters directly impact the precision and speed of the overall system, presenting increasingly more difficult challenges to circuit designers. As such, the design of A/D and D/A converters continues to remain a topic of active research in both academia and industry.

The objective of this special issue is to present the latest developments in the area of data converters. Original research papers dealing with all aspects of the design of high-performance data converters are solicited. The topics of interest include, but are not limited to:

- Nyquist-Rate and Oversampling Converters
 - High-Speed Architectures and Their Limitations
 - High-Resolution Architectures and Their Limitations
 - Calibration Techniques for High-Resolution Converters
 - Low-Power Techniques for High-Performance Converters
- Design Issues and Techniques for Converter Design in Deep-Submicron CMOS Technology
- Comparative Studies of Nyquist-Rate and Oversampling Converters
- Design of Data Converters for Specific Applications
 - Disk Drive Electronics
 - Wireless and RF Transceivers
 - Wireline Communications (Gigabit Ethernet, xDSL, etc.)
 - Imaging Systems and MEMS

GUEST EDITORS
